Work Experience

Full Stuck Developer / Technical Director (Jun 2017 - August 2020) Medix inc. / Tokyo, Japan

- Created SPA for centralized management which useful knowledge within the company that was stored in various locations. That SPA is made with **Docker**, **Laravel**, **Graphql** and **Vue.js**.
- As project leader, I selected technologies and supported members of the project team.
- Built a Staging environment and set a deployment system using **Github** webhook.
- Worked closely with other developers and UI designers in an agile environment.

Senior Web Developer (November 2014 - October 2016) Strawbag inc. / Tokyo, Japan

- Created a CI system that combined **Bitbucket**, **Wercker**, and **Slack** to support development when I built a job-search management site using the **php Slim** framework.
- Cooperated and built some web applications with the Chinese coworker. That's when I supported him by creating task management, specification explanations, sample code, and documentation.

Junior Web Developer (April 2013 - October 2014) BTM inc. / Tokyo, Japan

- Continued to release Smartphone game which over 100 php files, built with over 100 tables, used by over 10,000 people daily consistently.
- Created **Android** application that uses polymorphism in its design which is made with **Java** and I manage team tasks.

Junior Web Developer (Jun 2012 - March 2013) I-Freek / Fukuoka, Japan

- Modified an existing program made with Perl and deploy it on **Linux** while checking the Apache conf file with Vim.
- Supported **Android** app which uses GPS made with Java using Eclipse.
- Wrote clean and stable code and accompanying documentation.

Project

Famus Spot Tour (December 2020 - March 2021)

- Tech Stack: **Swift/Realm/SnapKit/Mapkit/Core Graphics/Core Animations/Firebase/Figma**
- An application that provides directions to people who don't know how to go there and introduces recommended spots to tourists who are new to Vancouver.
- Product manager, programmer, and UI designer working with my team members.
- Familiar with Apple's Human Interface Guidelines.

S-Portal (Jun 2019 - August 2020)

- Tech Stack: **Vue/SPA/Graphql/Laravel/Docker**
- SPA for centralized management of knowledge related to site production, accessed daily by 80% of all employees

FeedLP (January 2018 - September 2019)

- Tech Stack: **React/Go/AWS Fargate/Docker/MySql**
- We made an API for the job information used in the feed ads and used React to display it dynamically. The UI is now ready to be updated without any work on the server-side.
- <https://www.itstaffing.jp/lp/fd002?mfeed=D210100838D>

Landing Page and Wordpress (Occasionally 4 to 5 site per year)

- Tech Stack: **html/css(scss)/JQuery/Vue.js/php**
- Perfect coding using **css grid** and **flex-box** based on the design data (psd) to improve conversion rates.
- <https://www.iprimo.jp/>
- <https://www.exchangeuse.com/>
- <https://www.nichiweb.jp/kaji/>

Web browser Social game applications (January 2014 - October 2014)

- Tech Stack: **php/Smarty/MySql/JavaScript/Jira**
- Continued to release Smartphone game which over 100 php files, built with over 100 tables, used by over 10,000 people daily consistently.

Petico - SNS for pet owners (Jun 2013 - December 2013)

- Tech Stack: **Java/Redmine**
- Communicate with the API server via HTTP using JSON format / Share your pet's name and diary with other users

API for IOS map application (April 2013 - Jun 2013)

- Tech Stack: **php/Cakephp/Twitter Bootstrap**
- Providing information on the location of famous places via API
