Project

Famus Spot Tour (December 2020 ~ March 2021)
- Tech Stack: **Swift/Realm/SnapKit/Mapkit/Firebase/Figma**
- An application that provides directions to people who don't know how to go there and introduce recommended spots to tourists who are new to Vancouver.
- Product manager, programmer and UI designer working with my team members.

S-Portal (Jun 2019 - August 2020)
- Tech Stack: **Vue/SPA/Graphql/Laravel/Docker**
- SPA for centralized management of knowledge related to site production, accessed daily by 80% of all employees

FeedLP (January 2018 - September 2019)
- Tech Stack: **React/Go/AWS Fargate/Docker/MySql**
- We made an API for the job information used in the feed ads, and used React to display it dynamically. The UI is now ready to be updated without any work on the server side.
- https://www.itstaffing.jp/lp/fd002/?mfeed=D210100838D

Landing Page and Wordpress (Occasionally 4 to 5 site per year)
- Tech Stack: **html/css(scss)/JQery/Vue.js/php**
- Perfect coding using **css grid** and **flex-box** based on the design data (psd) to improve conversion rates.
- https://www.iprimo.jp/
- https://www.exchangeuse.com/
- https://www.nichiiweb.jp/kaji/

Original CMS (November 2014 - September 2016)
- Tech Stack: **php/Laravel/Slim/Phalcon/Cakephp/Zend/Smarty/MySql/JQuery/JavaScript**
- Creation of portal sites for group companies and renewal of architect office sites
- https://www.pharmaproduct.co.jp/
- https://mynavi-job20s.jp/
- http://k-ito.jp/

Web browser Social game applications (January 2014 - October 2014)
- Tech Stack: **php/Smarty/MySql/JavaScript/Jira**
- Continued to release Smartphone game which over 100 php files, built with over 100 tables, used by over 10,000 people daily consistently.

Video On Demand delivery system for PC (April 2013 - August 2013)
- Tech Stack: **Java/Spring/Velocity Template/Redmine**
- https://www.hikaritv.net/

Petico - SNS for pet owners (Jun 2013 - December 2013)
- Tech Stack: **Java/Redmine**
- Communicate with the API server via HTTP using JSON format / Share your pet's name and diary with other users

API for IOS map application (April 2013 - Jun 2013)
- Tech Stack: **php/Cakephp/Twitter Bootstrap**
- Providing information on the location of famous places via API

Momoko Planet (Augst 2012 - March 2013)
- Tech Stack: **php/Cakephp/JQuery/Twitter Bootstrap**
- The official website of a famous Japanese manga artist. Selling video and image content that can only be purchased from this site.

Fishing in Kyushu (Jun 2012 - October 2012)
- Tech Stack: **php/Perl/Postgresql**
- A web app that gives you the latest information on fishing and discounts on fishing gear.
- Migration of a feature phone site made with Perl to a smart phone site using php.

Work Experience

Full Stack Developer / Technical Director (Jun 2017 - August 2020) Medix inc. / Tokyo, Japan
- As project leader, I selected technologies and supported members of the project team.
- Built a Staging environment and set a deployment system using **Github** webhook.
- Described and suggested with specific solutions and man-hours to them who work as a Web Director and Sales could understand. When they consulted me about site minor modification, error repair, server construction and architecture.
- Created a website or web application which was considered UX and UI then improved user experience. For example, using Lazyload, **Intersection Observer API** and something like that.
- Explained the benefits of version control and created a culture where team members take using Github for granted.

Senior Web Developer (November 2014 - October 2016) Strawbag inc / Tokyo, Japan
- Created a CI system that combined **Bitbucket, Wercker and Slack** to support development when I built a job-search management site using the **php Slim** framework.
- Cooperated and built some web application with the Chinese coworker. That's when I supported him by creating task management, specification explanations, sample code, and documentation.

Junior Web Developer (April 2013 - October 2014) BTM inc / Tokyo, Japan
- Runs a **Linux** workshop in the company, lecturing on the basics of Linux and how to build an environment using **Vagrant and Chef**.

Junior Web Developer (Jun 2012 - March 2013) I-Freek / Fukuoka, Japan
- Modified an existing program made with Perl and deploy it on **Linux** while checking the Apache conf file with Vim.
- Created a script in php to migrate DB data and migrated over 10,000 records to another DB without any problems.

Education

Cornerstone International Community College of Canada / Vancouver, BC (September 2020 - present) / Web and mobile app development diploma
Fukuoka University / Fukuoka, Japan (April 1997 - March 2001) / Bachelor's Degree of Commerce
